STLE 1992 COMBINED SUBJECT AND AUTHOR INDEX

Each paper published during the indexed period is assigned a sequence number, the first two digits of which indicate the year in which the paper was published. The index may be entered either through the Subject Index or the Author Index.

The Subject Index design was revised in 1991, with keywords appearing in one of the following subject areas:

- Bearings
- Computing and Engineering Methods
- Extreme Conditions Tribology
- Friction
- Human and Environmental
- Lubricant Classes (by Application)
- Lubricant Components
- Lubricant Manufacture, Application and Disposal
- Lubricant Properties and Problems
- Lubrication Regimes
- Maintenance and Condition Monitoring
- Materials Properties and Tribology
- Metalworking, Materials Machining
- Seals
- Surface Technology
- Tribology of Equipment
- Tribology in Industry
- Wear and Failure

Inspection of the index will familiarize the user with the location of keywords. The sequence number of a paper appears next to the keywords which describe a significant part of the content of that paper.

The Author Index is an alphabetical listing of all authors of indexed papers, together with corresponding paper sequence numbers. Having determined the sequence numbers associated with a given subject or author, the papers to which these numbers refer may be found in the Chronological Listing. This Listing provides a complete reference for all papers published in 1992 issues of *Tribology Transactions* (**T35**) and *Lubrication Engineering* (**L48**), and in *Special Publications* **SP-32**, "Guidelines for Meeting Emission Regulations For Compressors with Advanced Sealing Systems," **SP-33**, "Guidelines for Controlling Fugitive Emissions with Valve Stem Sealing Systems," **SP-34**, "STLE Life Factors for Rolling Bearings," edited by E. V. Zaretsky, and **SP-35**, "Tribology and Mechanics of Magnetic Storage Systems, Volume VIII". The papers are listed by Author(s), Title, Publication, Volume Number (bold type), Issue Number, and Page Numbers and are in order of ascending sequence number.

An excellent source of general information in the field of tribology is the *Handbook of Lubrication*, edited by E. R. Booser and published by CRC Press under the sponsorship of STLE.
